British Telecommunications Engineering

INDEX

VOLUME 7

(April 1988–January 1989)

A

Access Systems, Flexible 233
Address to the Institution of British Telecommunications Engineers, Keynote
Telecommunications Services in the 1990s 226
Address to the Institution of British Telecommunications Engineers, Presidential
British Telecom's Future Network 82
ANIUS, P., JOHNSON, T. W., and LAW, B. CCITT Signalling System No. 7: Transaction Capabilities . . . 58
Antenna Support Structures—State of the Art, The Physical Design of 187
Application of Bar Coding in Parcel and Bulk Mail Handling 128
Associate Section 74, 148

B

BACK, R. E. G. British Telecom's Future Network
Presidential Address to the Institution of British Telecommunications Engineers 82
Bar Coding in Parcel and Bulk Mail Handling, Application of 128
BARNES, J., STARTIN, R. A., BOOTH, R. F., TRAWFORD, B. B., and DENNY, J. C. Using CEDRIC to Commission System X Concentrators 179
Blown Fibre Experience in the Local Loop 242
BOESVELD, A. Towards a European Telecommunity . . . 194
BOOTH, R. F., TRAWFORD, B. B., DENNY, J. C., BARNES, J., and STARTIN, R. A. Using CEDRIC to Commission System X Concentrators 179
Book Reviews 79, 149, 221, 277
BOWEN, J. H. Mini-COSMIC: A Small Modular Main Distribution Frame 264
BRAY, W. J. In the Beginning There Was . . .
Memoirs of a Telecommunications Engineer 111
British Telecom Press Notices
Automated Manufacturing Data On-Line 212
British Telecom at Communications 88 154
British Telecom Office Automation will Boost Efficiency 212
British Telecom's Public Telephone Revolution . . . 211
Distributing TV by Millimetre-Wave Radio 285
5 Million Customers Linked to World's Largest Civil Computing Project 155
Improvements in Packet Switching Data Service . . . 153
International Extension for IBM-Compatible Data Services 284
Irish Sea Optical-Fibre Submarine Cables 153
Major Computing and Communications Companies Form International Association 211
Optical-Fibre Breakthrough 210
Racenet London Extension 285
Talking Japanese at the Royal Society 154
TAT-8 Goes Live 284
£200M Extension for Fibre Network 213
Ultra-Modern Control Centre for London's Network 210
British Telecom Technical College
Part 1—Training Operations Section 138
British Telecom's Future Network
Presidential Address to the Institution of British Telecommunications Engineers 82
Broadband Upgrade, Passive Fibre Local Loop for Telephony with 237
Bulk Mail Handling, Application of Bar Coding in Parcel and 128

C

Cable Television Pioneer, Martlesham Medal for . . . 110
Call-Sending Equipment, Digitally Interfaced 74
CCITT Signalling System No. 7 in British Telecom's Network
FOREWORD 2
CCITT Signalling System No. 7: Integrated Services Digital Network User Part 46
CCITT Signalling System No. 7: Message Transfer Part 7
CCITT Signalling System No. 7: National User Part . . . 19
CCITT Signalling System No. 7: Overview 4
CCITT Signalling System No. 7: Signalling Connection Control Part 32
CCITT Signalling System No. 7: Testing Strategy for the British Telecom Network 66
CCITT Signalling System No. 7: Transaction Capabilities 58

CEDRIC to Commission System X Concentrators, Using 179
CLARKE, P. G., and WADSWORTH, C. A. CCITT Signalling System No. 7: Signalling Connection Control Part 32
CLOW, D. G. The Physical Design of Antenna Support Structures—State of the Art 187
COLLAR, B. E., and MITCHELL, D. C. CCITT Signalling System No. 7: National User Part 19
College, British Telecom Technical Part 1—Training Operations Section 138
Commission System X Concentrators, Using CEDRIC to 179
Common European Objectives 200
Concentrators, Using CEDRIC to Commission System X 179
Containerised System X Exchange, Felixstowe Dock Project—First 144
Converters, A New Generation of Signalling 255
